Rotman MMA Datathon 2018: Practice Questions

These are three practice questions that cover different types of analysis skills that you will likely need during the datathon. You are highly encouraged to complete these questions to understand the dataset as well as practice your analysis skills. We will release the answers to these questions 1-2 days before the Datathon begins.

Questions:

1. Find the regions (geohashes) of Multi-Passenger Vehicle (MPV) accidents with a high-severity score.
2. Find the number of motorcycle collisions near churches.
3. Plot the Road Impediments at Industrial Locations.
